2019
Bangladesh

ABOUT

Senior Laravel Engineer focused on building reliable, scalable web applications and APIs.

My core skills include **PHP, Laravel, REST APIs, MySQL, JavaScript, and backend architecture**. I focus on clean code, well-structured databases, secure APIs, and automated testing.

I also use modern AI tools like **Cursor, Claude Code, and Gemini** to speed up development, debugging, testing, and refactoring without compromising code quality.

Currently based in **Ajman, UAE**, and open to opportunities across the **Dubai/UAE market**.

Currently working at **X HUB TECHNOLOGIES L.L.C**, with 4+ years of previous experience building Laravel and Spring Boot ERP systems at **Zone Delivery Services**.

 PROJECTS

khaytly | [Link](#)
Jun 2026 - Present

Designed and shipped Khaytly (khaytly.com), a Laravel 13 / Filament 4 admin platform for tailor shop operations: customers and measurement libraries, multi-item orders with piece-level floor workflow, production board, staff earnings, payments, deliveries, and WhatsApp/status tracking. Deployed on cPanel with CI-gated promotions, covering tests, and a content/marketing site including geo-targeted affiliate tooling.
