SUMMARY

Backend-leaning software engineer shipping production software since 2018, with a deep focus on Laravel and Spring Boot for high-throughput JVM work. Currently lead engineering on the Nolo platform out of Dubai — a 13-store retail e-commerce portfolio, a multi-tenant warehouse fulfilment hub, and an iOS POS API. Specialised in payment integrations, conversion tracking, warehouse systems, auth hardening, and audit-grade order workflows — the kind of services that must be right because money moves through them.

EXPERIENCE

Software Engineer — X Hub Technologies LLC · Nolo platform 2025 – Present
Dubai, UAE

- Engineer across a 13-store retail e-commerce portfolio, a warehouse fulfilment hub, and an iOS POS API.
- Built and maintained payment integrations across N-Genius, Tamara, Tabby, Stripe, PayPal, and Ziina, plus token-protected custom-order payment links.
- Authored the canonical TOTP 2FA, OTP-hardening, and VAPID web-push patterns now reused across the portfolio.
- Designed bin-level inventory, reservations, multi-client baskets, and an OrderWorkflow state machine for the warehouse hub.
- Wired server-side conversion tracking (Meta CAPI, TikTok Events, Stape sGTM) with idempotency, dedup, and proxy modes.
- Shipped a Sanctum-secured mobile API for the Nolo iOS POS app — auth, orders, custom orders, dashboard, devices, and HMAC-signed metrics.

Software Engineer — Elite Zone Delivery Services – 2025
Dubai, UAE

- Laravel-first delivery on customer and operations platforms — Eloquent, Blade, queues, scheduled jobs.
- API and integration work supporting delivery, fulfilment, and customer-facing flows.
- Carried the same designation forward into X Hub Technologies in 2025.

Full-Stack & API Engineering — Earlier roles & freelance Since 2018
Remote · Bangladesh · UAE

- Laravel-first delivery for SaaS, e-commerce, and internal tooling — Eloquent, Blade, queues, jobs, scheduled tasks.
- Spring Boot services: REST APIs, JPA / Hibernate, Spring Security, AOP, automated testing with JUnit, Mockito, and MockMvc.
- Front-end work in Vue, Angular, and React; Next.js auth front-ends paired with Laravel Breeze backends.
- Open-source side projects: Laravel packages, a full-stack mess-management trio (Laravel + Express + Angular), and WordPress theme work.

TECHNICAL SKILLS

Backend	Laravel 10/11, PHP 8.x, Spring Boot, Java 17, Node.js / Express, Yii
Frontend	Blade, Vite, Tailwind CSS, Bootstrap, Vue.js, React / Next.js, Angular, TypeScript
Database	MySQL, MariaDB, Eloquent ORM, Redis (caching), JPA / Hibernate
Mobile / API	Laravel Sanctum, REST APIs, APNs, FCM, HMAC-signed endpoints
Payments	N-Genius, Tamara, Tabby, Stripe, PayPal, Ziina
Tracking	Meta CAPI, TikTok Events, Stape server-side GTM

Integrations	Odoo (XML-RPC), Twilio, Quiqup, SMSA, Halan, Topex, GetGive, Meshy AI
Auth & Security	TOTP 2FA, OTP hardening (CSPRNG, hash_equals, RateLimiter), Spatie RBAC, VAPID web push, Cloudflare Turnstile

SELECTED PROJECTS – NOLO COMMERCE PORTFOLIO

Chub Warehouse **GOLD STANDARD**

Group fulfilment hub: bin-level inventory truth, reservations, multi-client baskets, OrderWorkflow state machine, VAPID web push, TOTP 2FA, public REST API, and client billing. [chub.ae](#)

Odor Perfumes **GOLD STANDARD**

Tamara BNPL gold-standard implementation (HS256 JWT, idempotent webhooks, capture/refund), multi-branch POS with cash sessions, and plan-tier feature flags. [odor.ae](#)

Proboxs **GOLD STANDARD**

Unified Meta + TikTok + Stape conversion tracking with shared event-ID dedup, iOS POS companion, extra-payment requests, and X-Terms agreement gate. [proboxs.com](#)

+ 10 more production stores

Antiq, Ojo, Ducks, Raheeq, Bonoss, Capio Caps, Greenhand, Voguecult, Swords, Trtba — multi-brand UAE/GCC commerce with Odoo sync, multi-language EN/AR, and per-store payment, courier, and tracking integrations.
